

Dreamtime Healing

with Holographic Kinetics

What is Dreamtime Healing?

Dreamtime Healing is an advanced and unique healing modality which uses kinetic energy to go back through the hologram of time. It is based on the ancient Aboriginal knowledge of the laws of LORE.

Dreamtime Healing assists a client to access cellular memory passed down from generations and the cause and effect of events. It understands Man as a multidimensional being in a multidimensional world, consisting of a visible world (the physical day-to-day life) and an invisible world (such as chakras, meridians, spirit, soul, aura, etc).

Law= a rule laid down, an order of government and the order in which things happen.

Lore= Universal knowledge known by most indigenous cultures, incorporating creation and transcending all dimensions.

1. All things are alive and have a life force known as Spirit.
2. Life consists of birth-death cycles known as time.
3. No-one may own another Spirit
4. Man is responsible for his thought, word, deed and action and whatever we choose to create in our reality.
5. A problem (effect) has a cause in the past
6. Pain is trapped energy and can be freed.
7. If you visit another dimension (drugs, alcohol, invocation, ritual etc), that dimension has a right to visit you. These forces can create voices in the head, violence, compulsive disorders, Tourette's syndrome, suicide, multiple personalities, self-harm and much more.

How does it work?

Our success is achieved by clearing the trauma of events, thoughts and emotions which become locked in the Spirit through time. Adverse events in the past will continue to affect us in present time and our future until the trauma is cleared.

Dreamtime healing allows a client to go on their own non-invasive journey to understand why they struggle with life today. They learn that clearing and changing events in the past, changes the future. This gives them the freedom to choose to eliminate unacceptable patterns and behaviours and experience a happy life.

At the end of a clearing, clients typically report that they are feeling much lighter and clearer and if there has been a physical symptom, it has usually diminished or gone completely.

About Spirit

Indigenous cultures are fully aware of Spirit and the significance it has in their lives. The mainstream approach fails to include this in its treatments. The importance of Spirit must be recognised and accepted.

Whenever healing the Spirit has been mentioned, it is often associated with Spirituality, taking on a New-Age or Religious connotation, - it is neither. Dreamtime Healing is what Aboriginal and other cultures worldwide have been aware of for thousands of years.

Dreamtime healing understands that all things in nature have a life-force, known as a Spirit. When life-force has departed, we call it dead, but anything with a life-force (Spirit) is alive and can be communicated with.

Dreamtime healing accesses man's Spirit. Understanding the Spirit is the key. The Spirit is different from the soul and can be stuck in a cycle of trauma from its past.

Do you ever wonder why the same kind of things keep repeating over and over?

Within our society we often hear the words "I don't know why I keep doing the same thing over and over". These people are stuck in dimensions of repeat cycles of time and this can be cleared with immediate results.

Some of the most violent people have had their life turned around in one session by accessing the cause of the violence and clearing that dimension. This then stops the cycles from continuing into the future

Do you ever feel stuck or trapped?

When you think about something long enough it becomes a Thought form. Thinking about a thought form enough it becomes a Life form. Eventually, if you give a life form enough attention and energy it becomes strong enough to create its own intelligence and becomes an entity. Entities are our obsessive and compulsive desires and actions that take control of our lives.

When man holds onto a life form, it can crystallize in a stress point in the body e.g. an organ, bone, arm, leg, blood or muscle, in its own dimension of time. This then manifests as an effect in the form of pain, anxiety, guilt, stress, anger, self punishment, compulsive behavior, emotional problems, or confusion as examples. There are many other ways.

So people are stuck within dimensions of time repeating the same cycles over and over again as they continue to feed these life forms, without consciously knowing why they repeat these patterns e.g. drug and alcohol addiction and any self-sabotaging behaviour

We create within our own mind, internally created life forms and entities that then control us. We also inherit life forms and entities from our hereditary genetic line, so we are born entrapped in beliefs and programs from our ancestors; also known as conditioning.
